Plan 404 is built with privacy and convenience in mind. A charming covered front porch leads to the entry. The great room is adjacent to an island kitchen with walk-in pantry and dining area that overlooks the covered patio. There are two very separate bedroom wings, one with a master suite and one with two bedrooms and a shared bathroom.

Plan 404 features energy-efficient home design, including a photovoltaic solar electric system. Combined with energy-conserving construction techniques, advanced appliances and lighting, this means lower energy bills and environmental sustainability.

Pick up a copy of the Araby Crossing features list for a complete overview of the superior products that are included, and see how Elliott builds your home to be friendlier to the environment and your pocketbook.
